

REPLASTIKS

Plastic Recycling · Sultanate of Oman

Plastic, on repeat.

Turning plastic waste into resource.

Established in Oman in 2009, Replastiks collects, washes and recycles scrap plastic across the country — keeping it out of landfill and returning it to the manufacturing supply chain.

WHO WE ARE

Fifteen years of recycling in Oman.

Replastiks is the trading name of Muscat Industrial Development & Services LLC — an established plastic recycling company operating in the Sultanate of Oman since 2009. For over fifteen years we have transformed post-industrial and post-consumer plastic into clean, reusable raw material.

We export as much recycled material as possible to reduce the volume of plastic sent to landfill, operating a full in-house line from segregation through to pelletizing across two facilities.

LEGAL ENTITY

Muscat Industrial Development & Services LLC

TRADE NAME

Replastiks

MONTHLY CAPACITY

800 – 1,000 MT

OUTPUT

Washed flakes & clean granules

POLYMERS

PET, PP, LLDPE, HDPE, LDPE, PC

FACILITIES

Barka & Salalah (Raysut)

WHAT WE DO

Three ways to work with Replastiks.

Whether you're clearing scrap or sourcing recycled material, we're a dependable partner at both ends of the loop.

01

Sell us your scrap

We buy baled and loose PET, PP, HDPE, LDPE and LLDPE — a reliable, recurring buyer of post-industrial and post-consumer plastic.

02

Buy recycled material

Washed PET flakes and clean HDPE, PP, LLDPE and LDPE granules, supplied to manufacturers and exported.

03

Long-term offtake

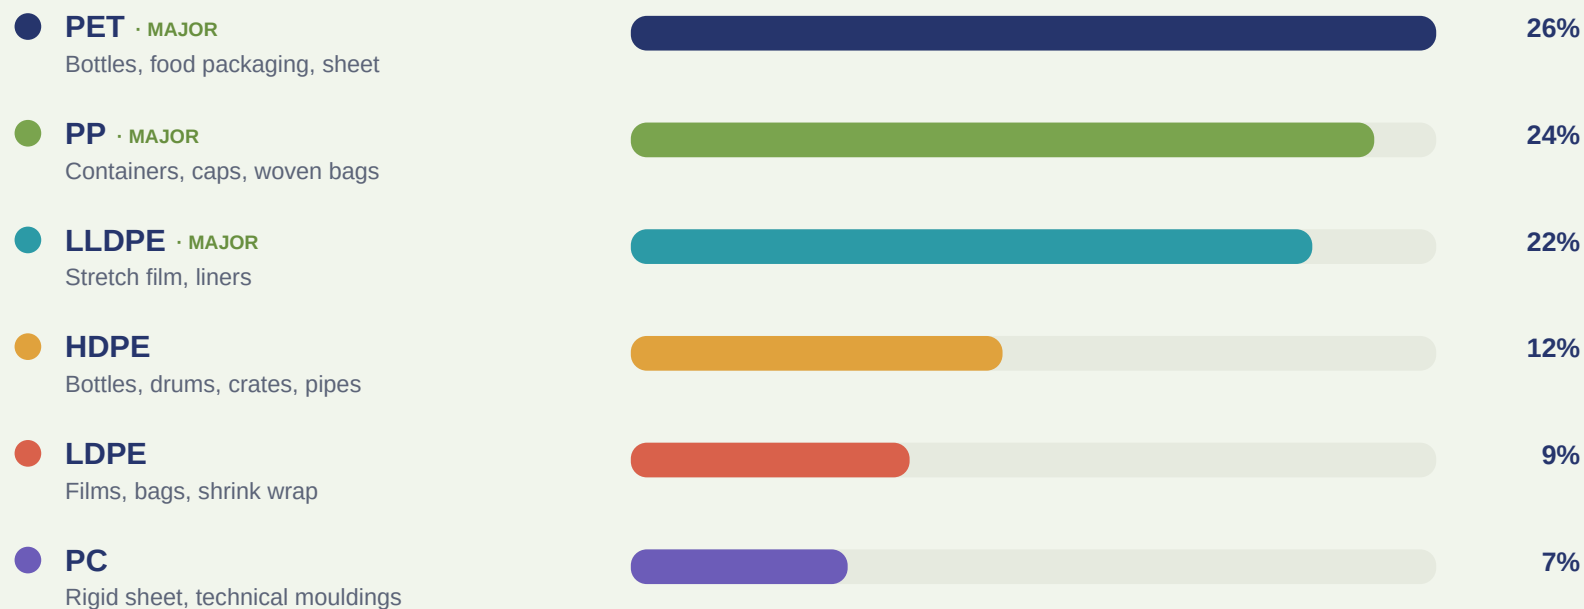

Set up recurring supply arrangements for steady volumes — consistent demand of 800–1,000 MT every month.

WHAT WE TAKE

Six polymer grades, two clean outputs.

PET, PP and LLDPE are our core volumes; HDPE, LDPE and PC are handled on a smaller scale. Mix varies with incoming supply.

Indicative share of polymers handled; mix varies with incoming supply.

OUR GRANULES

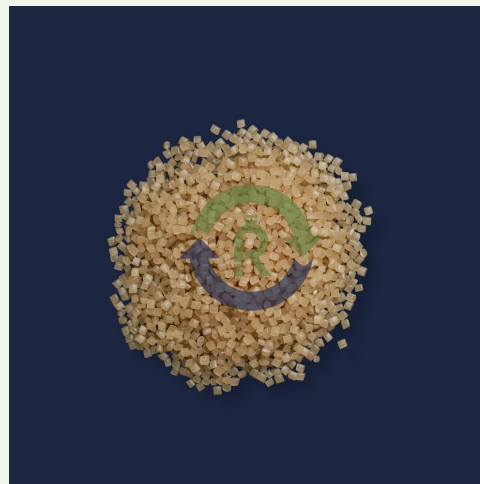

Clean, consistent recycled granules.

Produced at our Barka and Salalah facilities — ready for injection moulding, extrusion and film.

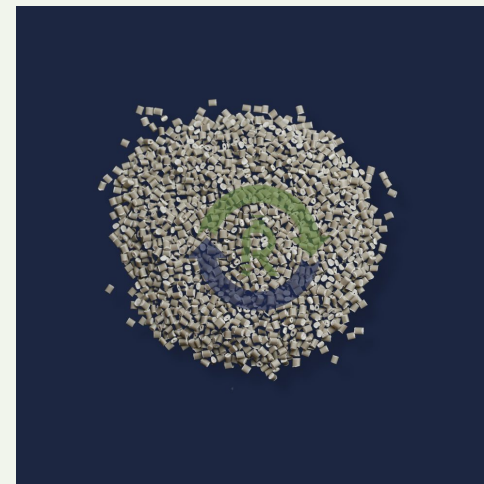

LLDPE

Natural white · stretch film, liners

LDPE

Natural · films, bags, shrink wrap

PP

Grey · containers, caps, woven bags

HOW IT WORKS

A complete, in-house recycling line.

Incoming scrap is sorted, size-reduced, cleaned and reprocessed into uniform flakes and granules — every step under one roof.

01

Segregate

Sort scrap by polymer type and colour.

02

Shred

Reduce material size with multiple shredders.

03

Crush

Crush rigid plastics down to a uniform flake.

04

Wash

The washing line removes dirt, labels and residue.

05

Granulate

Produce consistent, clean regrind.

06

Pelletize

Convert into market-ready recycled pellets.

OUR STORY

The Replastiks journey.

Why partner with us

- ✓ Established since 2009 — over 15 years of dependable operation.
- ✓ Consistent 800–1,000 MT/month demand — a steady buyer of scrap.
- ✓ Two strategic facilities covering northern and southern Oman.
- ✓ Full in-house processing, from segregation to pellet.
- ✓ Every load diverted from landfill, back into the supply chain.

WHERE WE ARE

Two facilities, north and south.

Strategically placed to collect scrap and serve partners across the whole of Oman.

NORTHERN OMAN

Barka

Our northern processing facility, close to Muscat's industrial belt.

PROCESSING

Segregation to pellet

SERVING

Northern Oman

SOUTHERN OMAN

Salalah · Raysut

Our southern site at Raysut, serving the Dhofar region and its port.

PROCESSING

Segregation to pellet

SERVING

Dhofar region & Raysut port

WHERE WE ARE

GET IN TOUCH

Let's work together.

Have scrap plastic to sell, or sourcing recycled flakes and granules? Reach out directly — we'd be glad to talk.

How we can work together

Buy our scrap — baled and loose PP, HDPE, LDPE, LLDPE and PET.

Supply recyclate — washed flakes and granules to manufacturers.

Long-term offtake — recurring arrangements for steady volumes.

Replastiks — turning today's plastic waste into tomorrow's resource.
